NOVEMBER 2018

ARE YOU BUSHFIRE READY ?

URGENT - NEW REQUIREMENT ON 2,4-D PRODUCTS

Incidents of spray drift damage attributed to 2,4-D have been reported for a number of years with significant incidents in the last 2 summer spray seasons, and the APVMA has been working closely with grower groups, state and territory authorities and other stakeholders to develop new label instructions to reduce the likelihood of off-target damage due to spray drift.

We consider that currently approved 2,4-D labels do not provide adequate instruction to effectively mitigate risk associated with spray drift.

As of 3 October 2018 the new 2,4-D label instructions came into effect and old labels have been suspended. Users of 2,4-D must comply with the new label instructions, even if they are using products with the old labels.

The APVMA has issued permit PER 87174 "The New Instructions" to allow persons to possess, have custody of, supply, and/or use 2,4-D products currently on farm and in retail outlets. Supply at the point of retail sale must occur with the new instructions being provided with each container supplied. (<https://apvma.gov.au/node/15581>)

It is a necessity to record all spray information including Delta T and inversion events.

Please ensure you receive a copy of the permit when purchasing.

Keeping you on the line

Gallagher & CRT supporting Lifeline's vision for an Australia free of suicide.

\$5
FROM EVERY
BAG GOES TO
LIFELINE

For every bag of limited edition blue Super Spring Pegs sold, Gallagher and CRT will donate \$5 to Lifeline.

Shout out to everyone for noticing us all wearing pegs!
Thank you all for sharing your stories.

3 age groups 0-3, 4-8, & 9-16.

THE TE PARI SHEEP JETTER HELPS YOU CONTROL BOTH FLY AND LICE IN YOUR FLOCK.

Using 20 jets that are strategically positioned to target the affected areas. The TePari Sheep Jetter is a proven design based on simplicity and reliability that can process up to 1000 sheep/hour.

The TePari Sheep Jetter is predominantly manufactured from stainless steel, reducing the unit's weight to 56kg. The strong, compact frame has few moving parts which means less maintenance. The unit comes complete with all necessary pipework including camlock fittings and intake filter.

DECORATE THE RIGHT WAY THIS SEASON CATALOGUE OUT NOW

The E.SYBOX and E.SYBOXMINI3 are completely new solutions in rainwater harvesting and cold water boosting for residential and light commercial applications.

They are an all in one pump and control solution comprising water cooled booster pump with integrated high efficiency variable speed motor.

The water cooled motor and sound dampening casing creates the quietest booster pumps available today.

The variable speed pump allows large power savings and a histogram on the pump display shows how much power has been saved when compared to a fixed speed pump.
