RACEWELL SHEEP HANDLERS

- Rugged construction and a well proven design
- Up to 6 way Manual or Auto weighing and drafting
- Unobstructed overhead access ideal for reading/applying ear tags
- Four Function Remote control controls clamp/release and drafting gates gate activated by the sensors
- Side Tilt option controlled by foot pedal for easy access to all sides of the animal
- Automatic closing of the entry gate activated by the sensors
- Easily adjustable optical sensors to allow for different catch positions. ie; set forward for capsule drenching in the middle for weighing or the rear for dagging
- Variable clamp pressure ensures animal comfort
- Rubber floor for improved footing of animals
- Integrated EID reader for optimum tag reading

RACEWELL HD4 SHEEP HANDLER SIDE TILT CRUTCHING FLAP

The Side Tilt option allows the sheep to be tipped 90 degrees for crutching. The controls are proportional, as in some situations you may only need to tilt it slightly and just take the weight off the feet to stop kicking. The tilt option is supplied with a foot pedal for ease of use. When the sheep is returned to the upright position, the clamp can be set to auto release providing hands-free operation.

Automated Animal Weighing & Drafting

KEY BENEFITS

- Time efficiency: Huge time savings on mustering and yard work.
- Fast adoption :The weighing platform is disguised with soil to create a natural walking surface.
- Reduced labour costs: Automatic drafting means you deal with a targeted group, not the whole herd.
- Maximised production: Get a complete performance history of individual animals.
- Informed decisions: Take the guesswork out of sales decisions with current, accurate data.
- Improved animal welfare: Fewer trips to yards reduces stress and wear on animals.

Remote walk over weighing systems are available in multiple configurations to suit your farming operations.

Sheep Handler V Express

ARROWQUIP

A sheep handler should be designed with low stress handling principles in mind, to ensure that producers can manage their sheep quickly and effectively through their processing system. Whether you are drenching, marking, crutching, or any other management task, you need reliable equipment that will perform time and again and can keep up to the requirements of your operation.

Prattley

3-Way Swing Gate AutoDraft

The Prattley Swing Gate AutoDraft is a powerful tool allowing a single operator to control weighing and drafting. The Prattley Swing Gate AutoDrafter coordinates with an external Indicator/recorder and loadbars to produce a seamless package.

The rear gates have vertical rollers which allow the gates to roll around sheep as they close and allow the following sheep to pull back without getting caught.

Designed to eliminate the need to have left or right hand operation.
Stationary or mobile available

AUTO DRAFTER

The Racewell Auto Drafter is used solely for weighing and drafting allowing you sort your lambs into weight lines to optimise growth and slaughter schedules.

The new Racewell DR3 Sheep Drafter is a dedicated weighing and drafting machine based on well-proven and respected Racewell technology. It has been designed for farmers who want a simple weighing and drafting machine without the full handling capability of the top-of-the-line Racewell HD3 Sheep Handler, but still utilising its 'Magic Eye' and radio remote control technology that provides flexible setup and ease of use.

AGENCIES

AUTO DRAFTER

RACEWELL TRAILER SYSTEM

3 BENEFITS OF USING THE TE PARI RACEWELL DR3/DR5 AUTO DRAFTER:

- 1. Intelligent Auto Sensing Entry Gate:** The entry gate is triggered by twin optical sensors. If a second animal tries to enter the crate and gets caught in the closing gate the intelligent auto sensing entry gate system will reopen and then close the gate again – by itself – after a few seconds, releasing the animal. In addition the entry gate is not part of the weighing zone. This means that if an animal waiting in the race puts load on the entry gate the weight recording will not be affected.
- 2. Integrated ePanel EID Antenna:** The innovative Te Pari ePanel Integrated EID antenna is integrated into the side of the sheep drafter. The ePanel reader addresses the requirement for a compact, unobtrusive antenna that ensures the EID ear tag is accurately read no matter where the sheep is holding its head. As the antenna is very close to the sheep false reads of the EID tag is very rare.
- 3. Effective Drafting:** The Te Pari Racewell DR3 Sheep drafter with a Te Pari scale indicator can draft sheep 9 ways out 3 drafting gates. This allows you to split your draft lines into more accurate groups and headbails.

Drafting Race

The cradle-shaped sides on the V-Side Sheep Drafting Race restricts sideways movement to keep your sheep moving forward in a single-file line through the draft. The interior space at the top of the V-Side Draft is 547mm, and the space at the bottom of the draft is 182mm to ensure sheep will never turn back. When combined with the 1200mm long gates on the draft, the V-Side Sheep Drafting Race allows you to sort your sheep quickly and easily in three directions with only one handler.
