

The background of the page is a soft-focus illustration of a rural landscape at sunset or sunrise. It features a tall, grey metal windmill on the left, a small wooden farm house with a chimney on the right, and several trees in the distance. The sky is a gradient of pink, orange, and yellow, and the foreground is filled with golden-brown grass.

## Te Pari a world leader in livestock handling equipment.

We focus on one thing, making livestock equipment that is safe and efficient.

**Safe** – We are committed to safety in the workplace and have obtained a Tertiary Level ACC Workplace Safety Management System for the last eight years.

**Lean** – We have embarked on a Lean journey in the production facility and we are evermore searching to improve efficiency and productivity.

**Automated** – Ten years ago, we invested in our first welding robot. Currently we have eight robots fulfilling different key roles in our factory as well as five CNC machines with plan for further automation already on the drawing board.

**Sustainable** – With a dedicated sales and marketing team actively building the business, an R&D team working on new innovative products and a strong focus on conquering new emerging marketing we plan to keep the production facility busy for years to come.

## RACEWELL HD4 SHEEP HANDLER

- Rugged construction and a well proven design
- Up to 6 way Manual or Auto weighing and drafting
- Unobstructed overhead access ideal for reading/applying ear tags
- Four Function Remote control controls clamp/release and drafting gates gate activated by the sensors
- Side Tilt option controlled by foot pedal for easy access to all sides of the animal
- Automatic closing of the entry gate activated by the sensors
- Easily adjustable optical sensors to allow for different catch positions. ie; set forward for capsule drenching in the middle for weighing or the rear for dagging
- Variable clamp pressure ensures animal comfort
- Rubber floor for improved footing of animals
- Integrated EID reader for optimum tag reading

## RACEWELL HD4 SHEEP HANDLER SIDE TILT CRUTCHING FLAP

The Side Tilt option allows the sheep to be tipped 90 degrees for crutching. The controls are proportional, as in some situations you may only need to tilt it slightly and just take the weight off the feet to stop kicking. The tilt option is supplied with a foot pedal for ease of use. When the sheep is returned to the upright position, the clamp can be set to auto release providing hands-free operation.

## RACEWELL HD4 SHEEP HANDLER

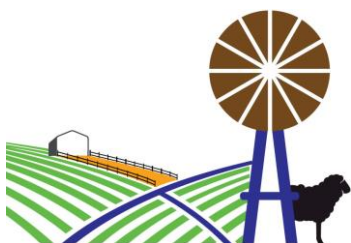

This specially designed hot dip galvanised trailer makes it easy to transport your Racewell Sheep System around the farm or between properties.

It features a retractable drawbar, removable wheels, and a fold down working platform. The hydraulic lift makes it easy and very quick to remove the wheels and lower the whole trailer to the ground. In its working position the maximum width of the trailer is 900mm without wheels on. The trailer system is easy to manoeuvre and fit into most yard situations, and an optional Duratorque suspension for longer travel distances is available.

## AUTO DRAFTER

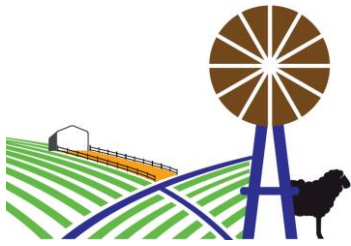

The Racewell Auto Drafter is used solely for weighing and drafting allowing you sort your lambs into weight lines to optimise growth and slaughter schedules.

The new Racewell DR3 Sheep Drafter is a dedicated weighing and drafting machine based on well-proven and respected Racewell technology. It has been designed for farmers who want a simple weighing and drafting machine without the full handling capability of the top-of-the-line Racewell HD3 Sheep Handler, but still utilising its 'Magic Eye' and radio remote control technology that provides flexible setup and ease of use.

## AUTO DRAFTER

### RACEWELL TRAILER SYSTEM

#### 3 BENEFITS OF USING THE TE PARI RACEWELL DR3/DR5 AUTO DRAFTER:

- 1. Intelligent Auto Sensing Entry Gate:** The entry gate is triggered by twin optical sensors. If a second animal tries to enter the crate and gets caught in the closing gate the intelligent auto sensing entry gate system will reopen and then close the gate again – by itself – after a few seconds, releasing the animal. In addition the entry gate is not part of the weighing zone. This means that if an animal waiting in the race puts load on the entry gate the weight recording will not be affected.
- 2. Integrated ePanel EID Antenna:** The innovative Te Pari ePanel Integrated EID antenna is integrated into the side of the sheep drafter. The ePanel reader addresses the requirement for a compact, unobtrusive antenna that ensures the EID ear tag is accurately read no matter where the sheep is holding its head. As the antenna is very close to the sheep false reads of the EID tag is very rare.
- 3. Effective Drafting:** The Te Pari Racewell DR3 Sheep drafter with a Te Pari scale indicator can draft sheep 9 ways out 3 drafting gates. This allows you to split your draft lines into more accurate groups and headbails.

## SHEEP JETTER

### Sheep Drenching

Using 20 jets that are strategically positioned to target the affected areas. The Te Pari Sheep Jetter is a proven design based on simplicity and reliability that can process up to 1000 sheep/hour.

The Te Pari Sheep Jetter is predominantly manufactured from stainless steel, reducing the unit's weight to 56kg. The strong, compact frame has few moving parts which means less maintenance. The unit comes complete with all necessary pipework including cam-lock fittings, and intake filter.
