

Stock Feeding

Cradle Round Bale Feeder

KEY FEATURES

- Reduce Waste
- Light Weight
- Easily Moved
- Galvanised

All fodder conservation systems waste a certain amount of feed. These losses occur during harvesting, storage and feeding out. Round bale systems are no exception, and often have very high losses. Feeding losses are often overlooked, but incorrect feeding out of round bales can easily result in wastage greater than the combined losses that occur during harvesting and storage.

Weight:	80kg
Assembled dimensions	1900x1380x915 (LxWxH)
Flat-pack dimensions:	1900x915x140 (LxWxH)
Gap Between Bars:	200mm
Bale capacity:	1x 4'x6' round bale
