SHEAR GEAR

100% Cordless Hand Piece

After extensive testing of various designs, we are proud to offer the 100% Cordless Shearing Handpiece for sale to other Australian sheep farmers. Tested, sold and backed by people who actually use them, you can be confident that this unit will perform as promised. Dependable and rugged, it is the best value shearing handpiece available in Australia today.

It's air cooled, rechargeable and ideal for treating fly-blown sheep and touch up crutching in the yards. It comes with a set of crutching blades, 100ml of clipper oil and is presented in a handy carry case.

The 100% Cordless Shearing Handpiece has been designed to give a balance of power and reliability. Set up correctly, it will run cool all day long, as well as putting up with bouncing around in an ATV toolbox, or behind a ute seat.

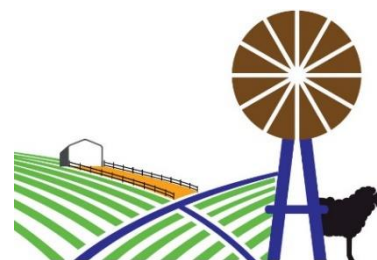

It is not intended as a replacement for a heavy duty overhead shearing plant, but as a day to day 'touch up' tool, saving time and money otherwise spent mustering stock for treatment.

KEY FEATURES

- Air Cooled
- Weighs 1.2kg.
- Comes with a 2nd Battery
- Compatible with Common Combs & Cutters
- 5ah Lithium Batteries
- Up to 70 Crutches per battery
