

Sheep Handler V Express

 **ARROWQUIP**

KEY FEATURES

- Low Stress Handling
- Quick & Efficient
- Drenching
- Marking
- Crutching

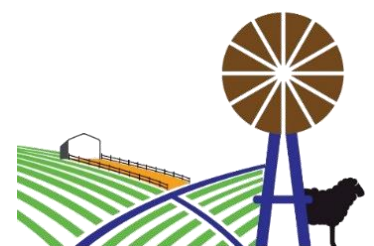

How many hours do you spend on drenching, back lining, mouching, vaccinating, foot trimming, crutching, wool classing, ear tagging, mouching, preg testing, capsuling or any of the many other time consuming sheep handling tasks you need to perform?

How many times have you thought "There must be an easier way!"

Here is your solution: The V-Express!

This amazing handler uses two conveyor belts to create a "v" shape that lifts the animals from the ground to a safe working height, keeping their feet off the ground and holding their bodies firmly so that you can easily access them as needed and keep them moving.

Fully adjustable and suited to all sizes of sheep and goats the V-Express makes easy work of all your handling tasks. Even rolling animals takes minimal effort as the belts do all the hard work for you.
