RAPIDFLO ROTARY FUEL PUMP

- The GT RAPIDFLO™ is a rotary action pump suitable for transferring diesel, ULP, aviation fuels, kerosene & light oils (up to SAE30).
- The RAPIDFLO™ is capable of transfer rates of 800ml per revolution (up to 100L/min depending on viscosity) from 60 - 205L drums and tanks.
- The pump is easy to prime and is capable of fluid delivery in both directions.
- The RAPIDFLO™ is supplied with a 3-piece suction tube, pump handle, 2" bung adaptor and 2.4m anti-static delivery hose.
- The RAPIDFLO™ is also suitable for users who either cannot use an electric fuel pump for safety reasons or do not have access to power in remote locations.
- It can be used to transfer AV-Gas* and Jet A1 although users of aviation fuels must check material compatibility with the fuel product they are using.

KEY FEATURES

- 800ml per revolution
- 100Litres / Minute
- 2.4m Rubber Delivery Hose
- Anti-kink Springs
- 3 Piece Suction Tube
- 60 – 205 litre Drums
- Diesel
- U.L.P.
- Oils to SAE 30
- 193 Micron Built in Strainer
- Lockable Handle
